

A high reliability organization

Georgetown Behavioral Health Institute Opens New Unit!

Dual Diagnosis Unit Opens June 1st
Dr. Nour, the Chief Medical Officer and Addictionologist for GBHI, is proud to announce the opening of our new dual diagnosis unit! Using the Medical Model for treatment, focusing on the mind, body and spiritual needs with a Licensed Chemical Dependency Counselor-facilitated group including individual therapy. We also use Cognitive Behavioral therapies with co-occurring curriculum. The discharge plan includes a multi-disciplinary step down team which includes the option of partial hospitalization (5 days per week) with the same provider and/or intensive outpatient treatment (3 days per week). The program length for hospitalization depends on the drug being detoxed and the mental health diagnosis.

22 Beds

**Medical detox
with Suboxone
available**

**Contracted with
most Insurances**
